Orbs

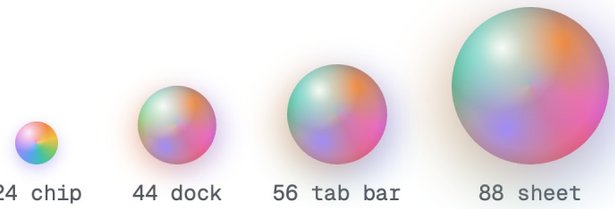

The main controller holds every section's colour. Each section orb is one hue from it, so you see the multicolour orb on home and the matching colour once you're inside a section.

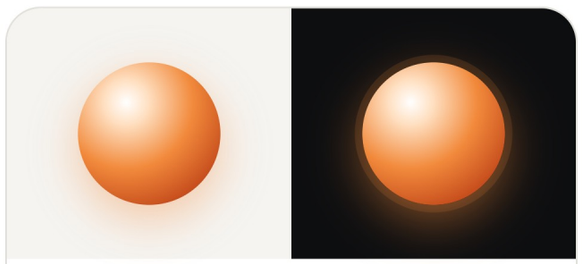

MAIN CONTROLLER

Multicolour

It's built from three layers. At the bottom, a conic sweep through all eight section hues. On top of that sit three soft colour blobs (violet, tangerine, teal), and the bottom two layers rotate together slowly, once every 24 s. The top layer is a fixed white highlight with an edge shade, which keeps it reading as a sphere while the colour moves underneath.

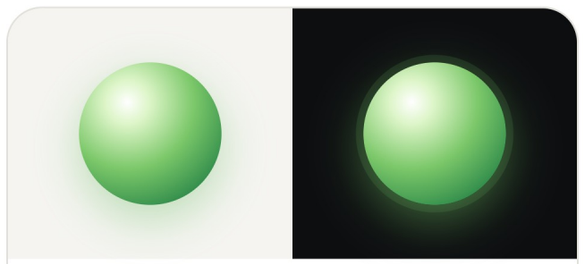

`conic from 210°: #5FA2F2 → #A08CF7 → #E36BD6 → #F2667A → #F28A3C → #F2C34A → #7CC86A → #3FC1B0 → #5FA2F2`
